

Made By Laravel

POINT OF SALE

GET STARTED

Initial Idea & Problem

- 01 MR-X is has a bakery.
- 02 Currently he manually try to track his business using tally khata, but it is not accurate and also kills his time.
- 03 He needs to solution that he can track his sales,
- 03 From system data he can decide the right/wrong and enhance his business

Basic Requirement

- 01** Should have product category listing
- 02** Should have product listing
- 03** Sales & invoice features
- 04** Business report features
- 04** System should be multiuser , that many business can use it by creating profile

The background features a series of concentric circles in shades of light orange and light teal. Scattered around these circles are several small dots, some in dark teal and others in light orange, creating a modern, geometric aesthetic.

AGILE

PROJECT MANAGEMENT APPROACH

PHASE 01

1. **Planning User Profile Table**
2. **User Profile Auth Back-End Development**
3. **User Profile Front-End Development**

Phase 01

Planning User Profile Table

users	
id	BIGINT
firstName	VARCHAR
lastName	VARCHAR
email	VARCHAR
mobile	VARCHAR
password	VARCHAR
otp	VARCHAR
created_at	TIMESTAMP
updated_at	TIMESTAMP
▸ Constraints	
▸ Indexes	

Phase 01

Developing User Auth Back-End Features

1. **User registration (end point)**
2. **User login & issue JWT token (end point)**
3. **Sending OTP Code to Email - Password Recover Stage 01 (end point)**
4. **Verify OTP Code - Password Recover Stage 02 (end point)**
5. **Allow user to reset password - Password Recover Stage 03 (end point)**
6. **Allow user to get profile details (end point)**
7. **Allow user to update profile details (end point)**

Phase 01

Agile Pros

- ✓ High flexibility of the project and the ability to adapt projects frequently.
- ✓ High customer satisfaction over the development process.
- ✓ Constant interaction among stakeholders that stimulates creativity and leads to better results.
- ✓ Continuous quality assurance and attention to detail.

Agile Cons

- ✓ Problems with workflow coordination.
- ✓ Difficult planning at early stages where you should assess resources, build up teams, and communicate an overall vision of the project.
- ✓ Only experienced software developers, testers, and managers should be working on the project.
- ✓ Lack of long-term planning.

Phase 01

Face the challenges of agile & take advantages

- We decide to use users table primary key "id" for further database works.
- We decide to use redirect unauthorised user form middleware
- Use decide to use TokenVerificationMiddleware for data end point and also page level browsing.
- JWT Token managing through web cookies

PHASE 02

1. **Planning Product Category Table By Profile**
2. **Category Managing Back-End Development**
3. **Category Managing Front-End Development**

Phase 02

Planning Category Table

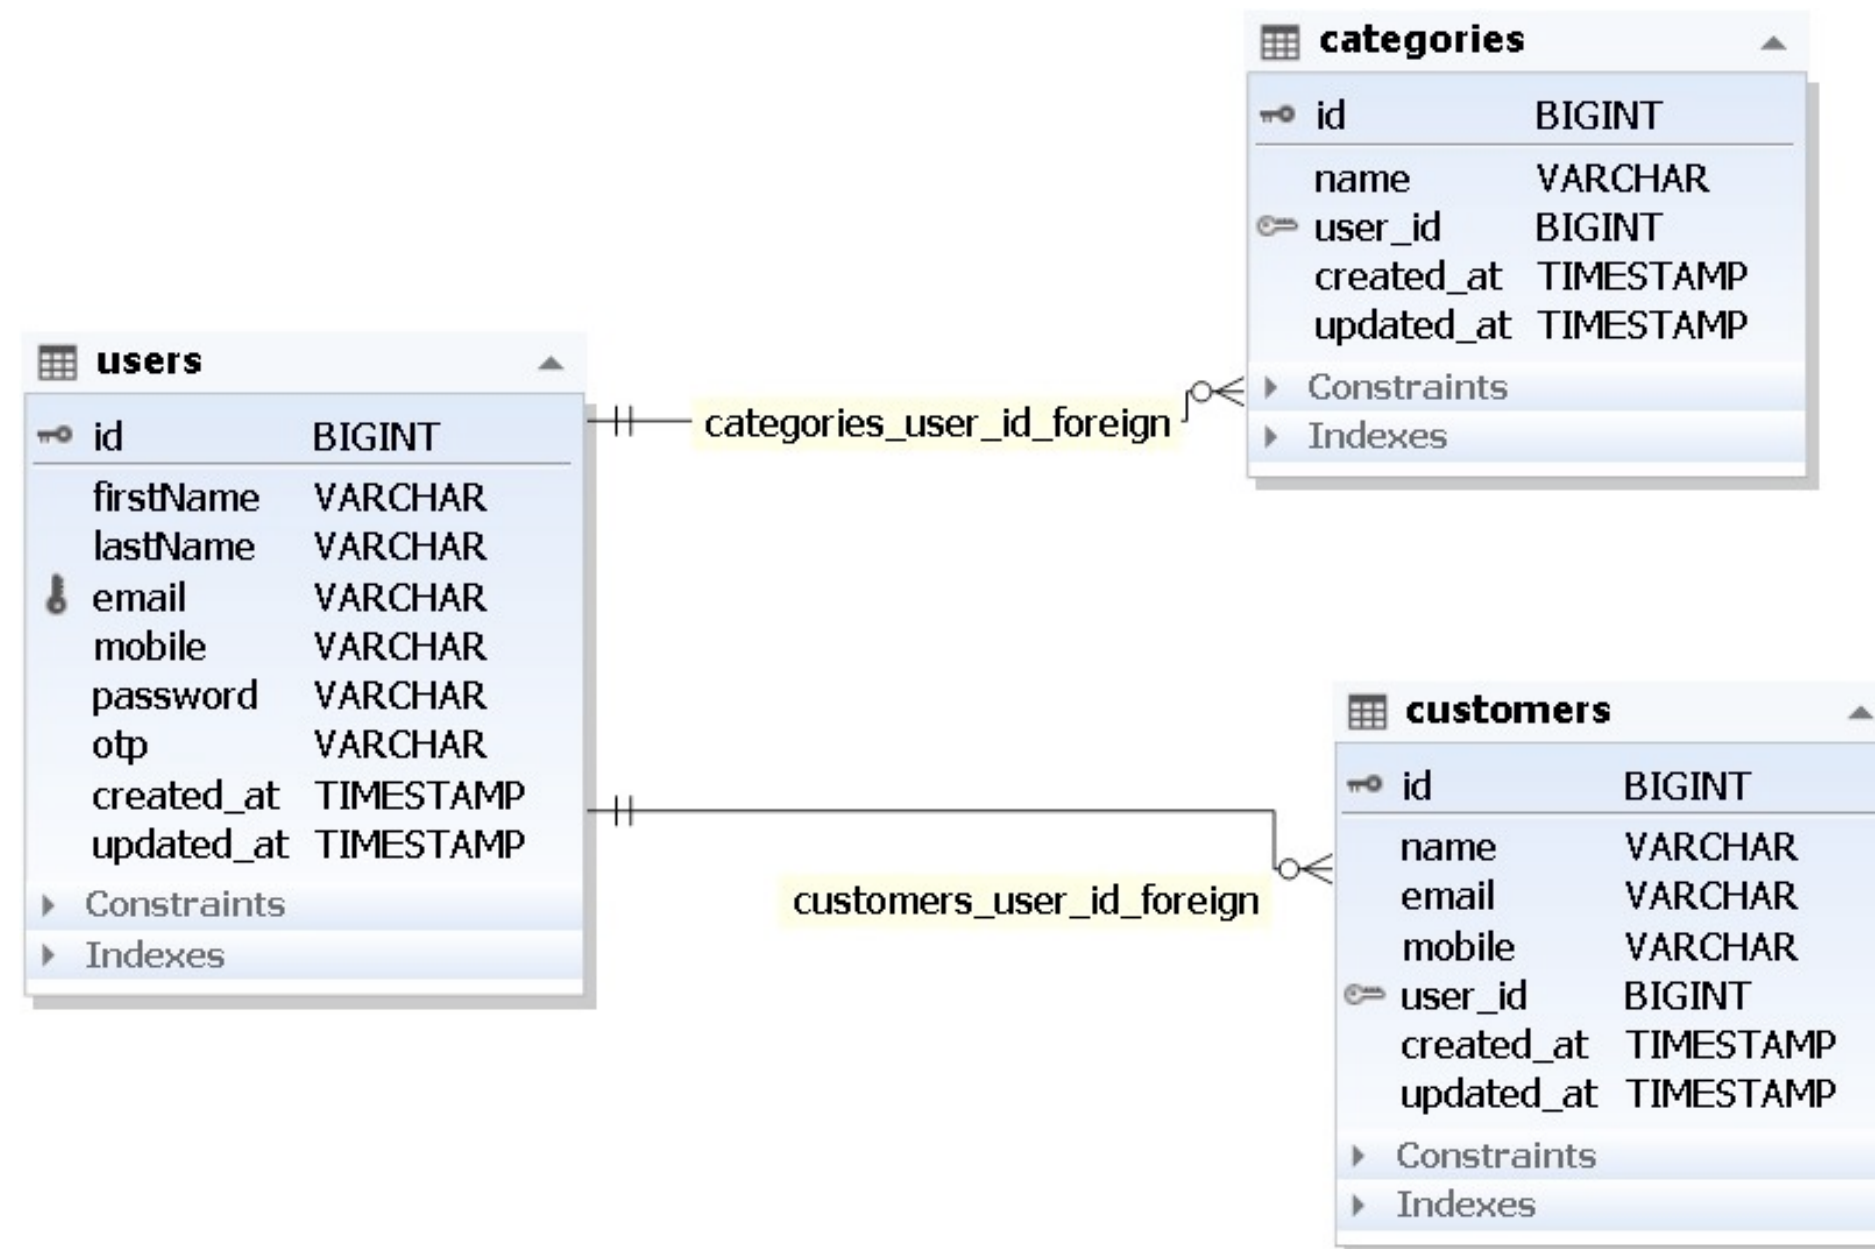

PHASE 03

1. **Planning Customer Table**
2. **Customer Managing Back-End Development**
3. **Customer Managing Front-End Development**

Phase 03

Planning Customer Table

PHASE 04

1. **Planning Product Table**
2. **Product Managing Back-End Development**
3. **Product Managing Front-End Development**

Phase 04

Planning Product Table

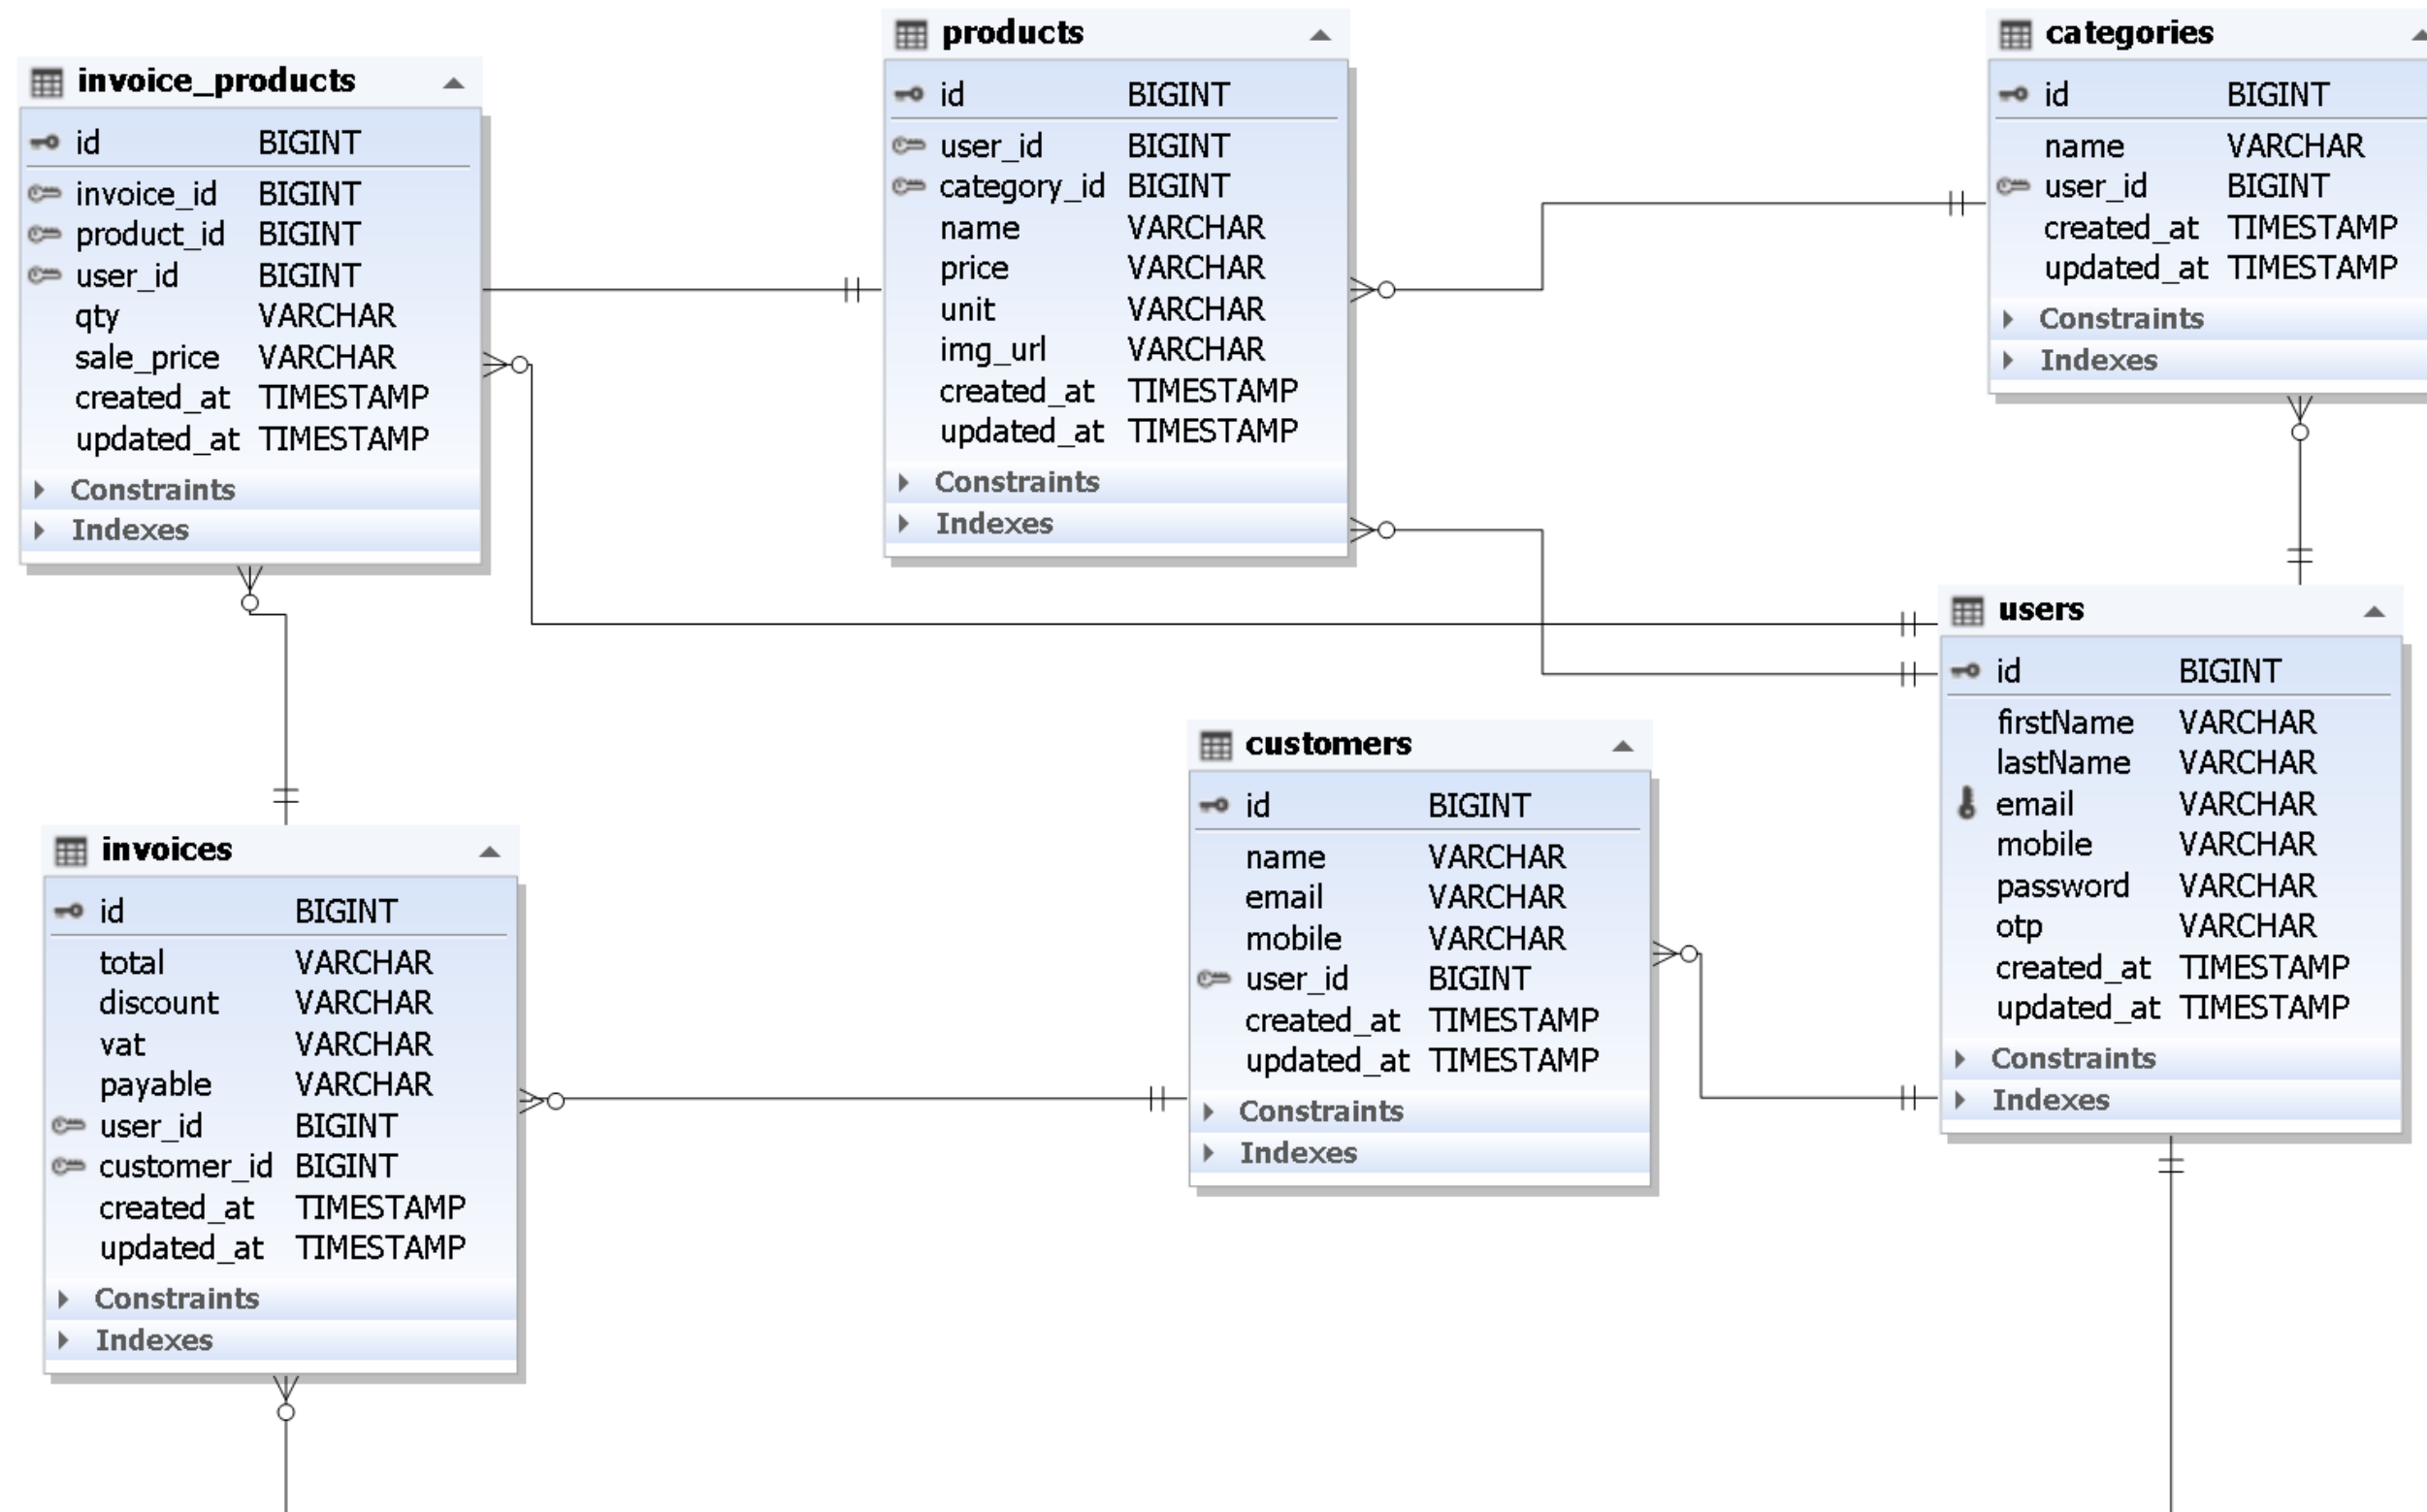

PHASE 05

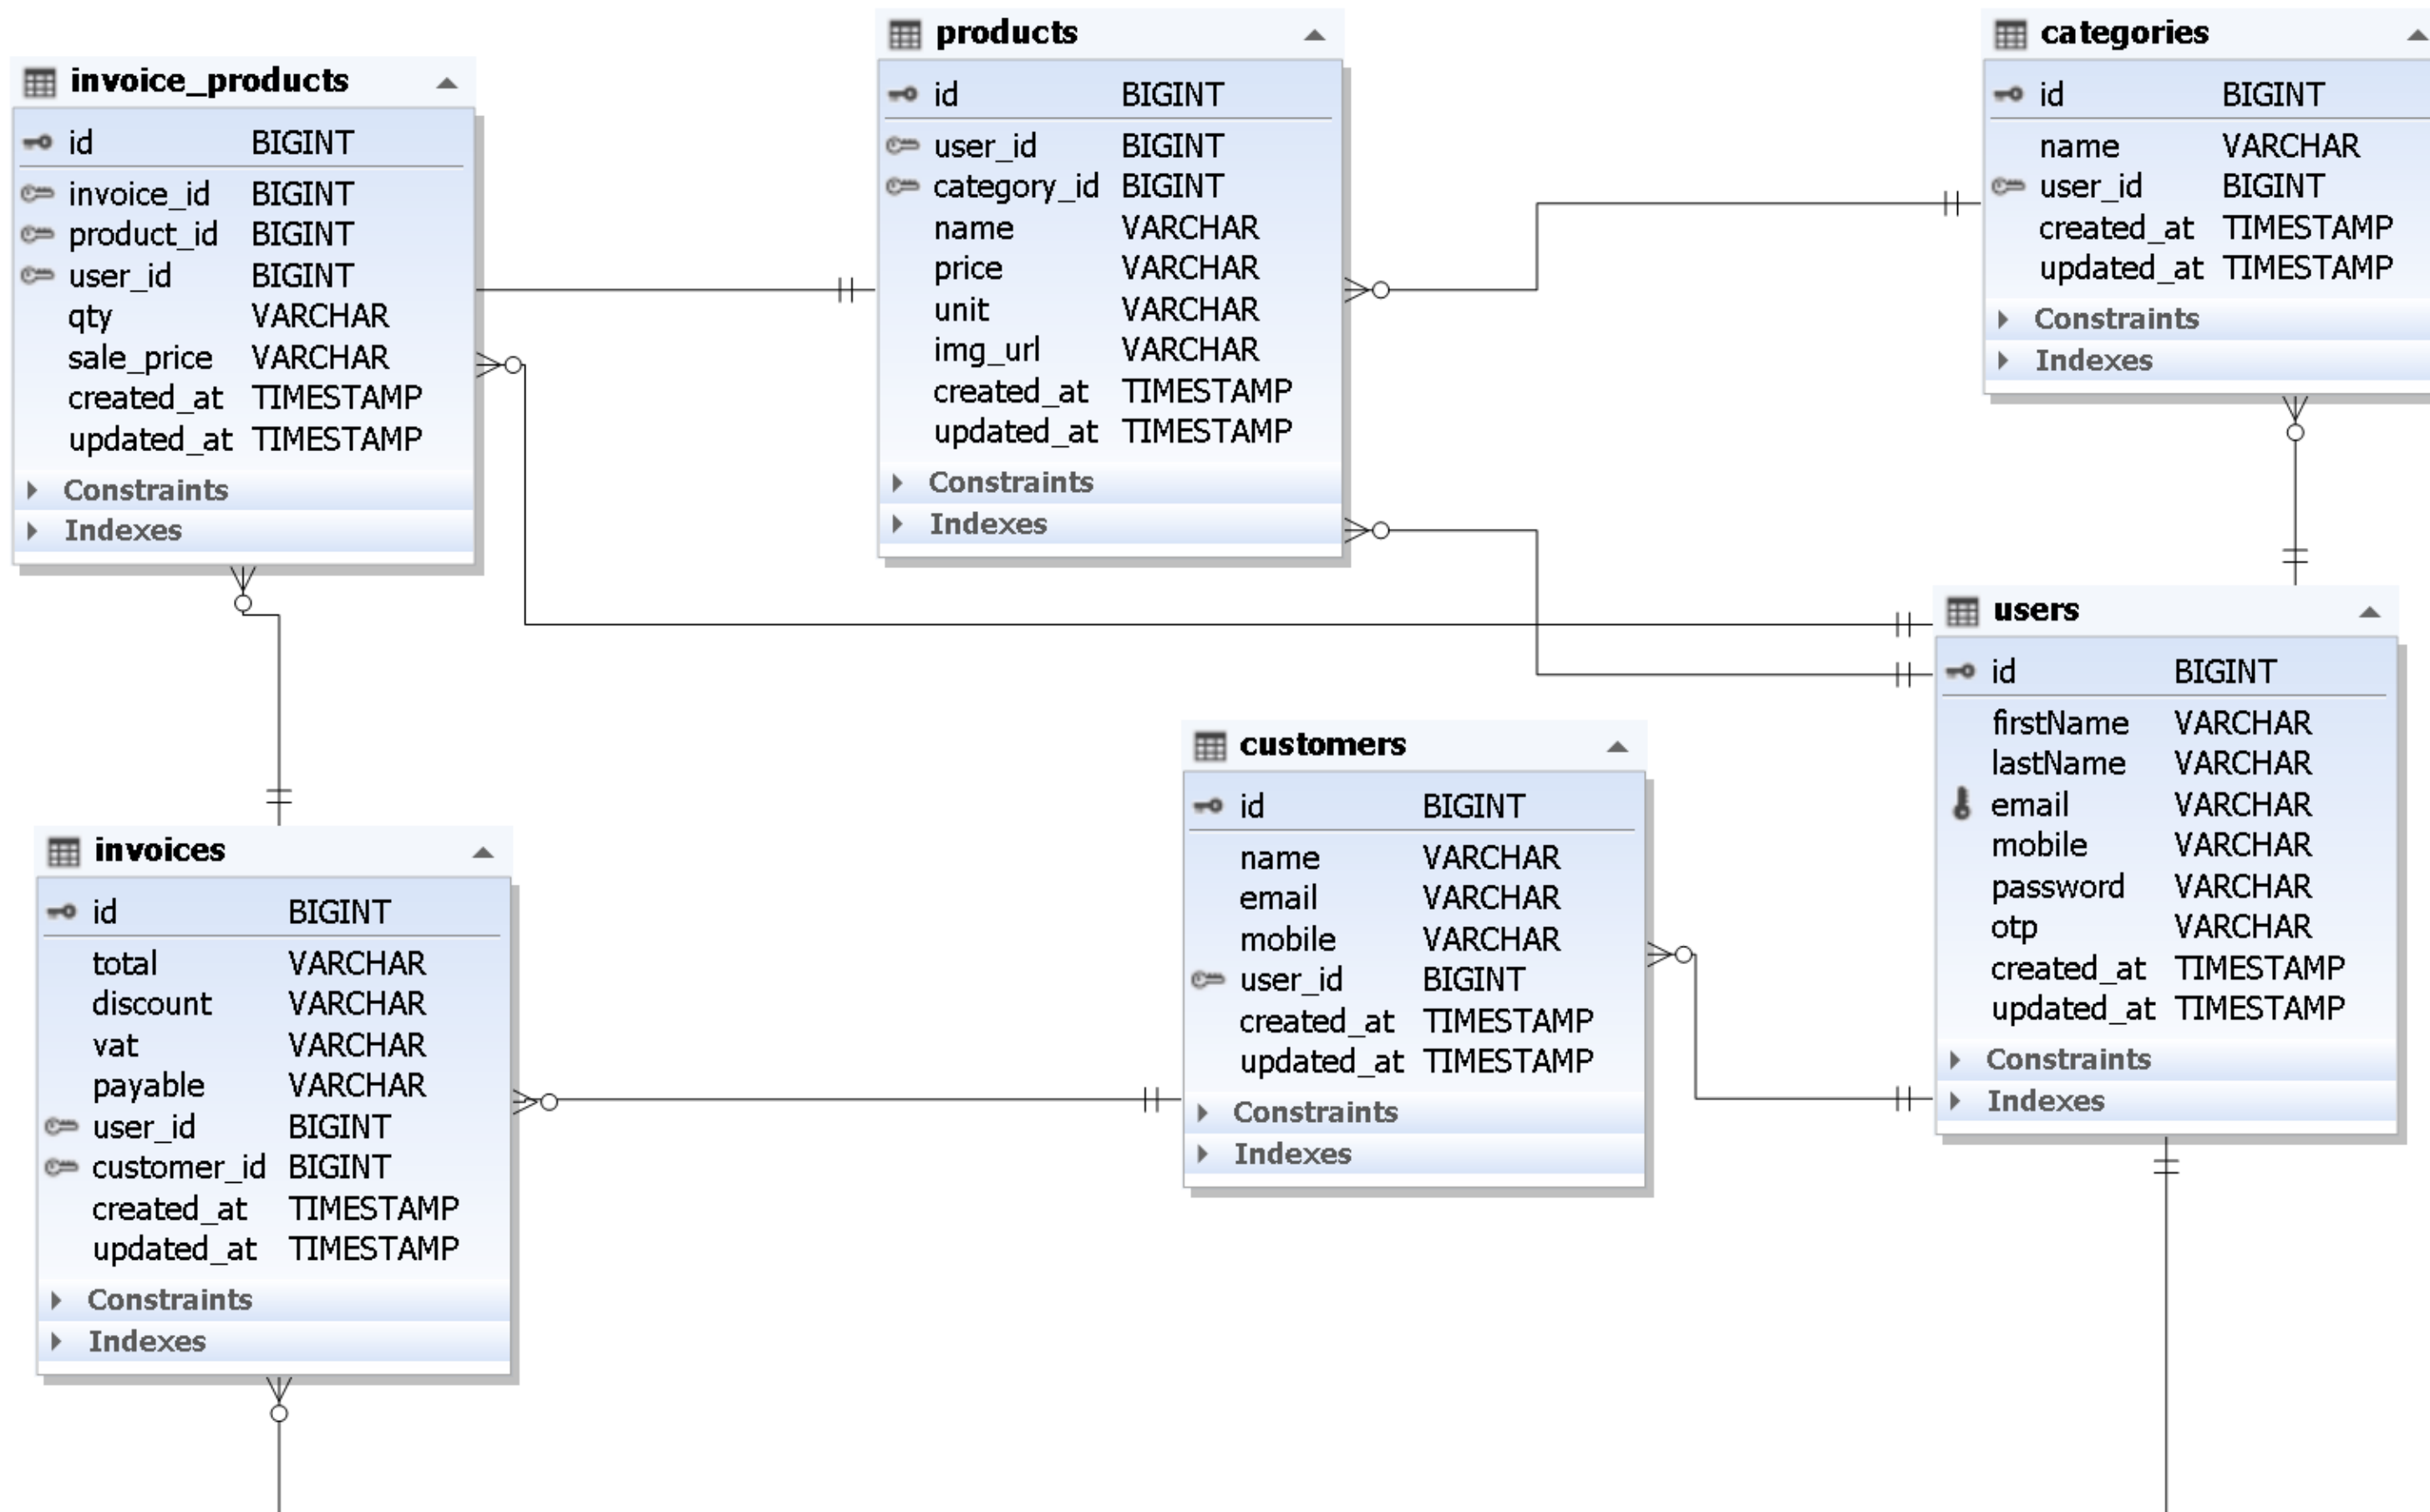

1. **Planning Invoice Table**
2. **Product Invoice Back-End Development**
3. **Product Invoice Front-End Development**

Phase 05

Planning Invoice Table

PHASE 06

1. **Dashboard summary - Total customer, Product, Sales, Category**
2. **Business Report - Date to Date sales report**

PHASE 07 TESTING

1. **User Profile Module**
2. **Category Module**
3. **Product Module**
4. **Invoice Module**
5. **Dashboard Summary**
6. **Report Generation**

PHASE 08 DEPLOY

In Linux shared hoasting
